MONTHLY SUMMARY
OF
COMMERCE AND FINANCE
OF THE
UNITED STATES

APRIL, 1912

WASHINGTON
GOVERNMENT PRINTING OFFICE
1912

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained. The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheds, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." (Rev. Stats. 335, secs. 18 and 11 of the act of June 10, 1890, as amended by act of Aug. 5, 1909, sec. 28, and Customs Regs., 1903, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel: Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

G. A. WEBER, Chief, Division of Internal Commerce.

APRIL SUMMARY OF INTERNAL TRADE MOVEMENTS.

The summary of Internal Commerce for April, 1912, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for April and the four months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-one different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for April and four months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise, and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

These movements include receipts and shipments for April and four months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities; thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during April and four months ending April. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During April transactions at 75 ports of receipt and 95 ports of shipment were reported. The number of vessels arriving in April was 2,411, and the departures numbered 2,722. The net registered tonnage for the month was as follows: Arrivals, 2,238,196 net tons; departures, 2,954,210 net tons. These totals do not include the tonnage of vessels engaged in the trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, APRIL AND FOUR MONTHS ENDING APRIL, 1910-1912.

A summary of the Lake traffic for April, and season ending April 30, 1912, compared with the corresponding periods in 1910 and 1911, is given in the following table, which groups the 16 items, for which figures are presented in the subsequent tables, under 6 more general heads, reduced to their equivalents in short tons. The item "grain and flaxseed" is exclusive of bran and mill stuff, which is comprised under unclassified freight. The item "coal" is composed of anthracite and bituminous coal. The class "ore and minerals" includes pig iron and iron manufactures. The item "lumber" is exclusive of logs, which are reported separately to this office and are included under "unclassified." In addition to logs, the latter class includes a large number of items such as firewood, pulp wood, ties, cement, sand, oil, stone, etc. It also includes the item "package freight," which is commercially the most important item.

¹ Includes flaxseed.² Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 1655.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing under bond through Canadian territory, is known as "in-transit" movement. This class of tonnage, which required the use of the Great Lakes as a link in its journey in April, 1912, consisted of the following: Receipts at Chicago, 1,484 short tons unclassified freight, and Milwaukee, 581 short tons of unclassified freight. Shipments from Chicago, 330,300 bushels corn, Conneaut, 43 short tons of iron manufactures, and Superior, 364,500 bushels oats.

The total "in-transit" movement for April was 43 short tons iron manufactures, 330,300 bushels corn, 364,500 bushels oats, and 2,065 short tons unclassified freight.

During April, 1912, there were inspected into vessels at Chicago, as reported by the State grain inspector, 1,699,420 bushels of grain, composed entirely of wheat. During April, 1911, there were inspected 3,879,139 bushels of grain, composed of 309,700 bushels wheat, 3,336,439 bushels corn, and 233,000 bushels oats.

During the season ending April 30, 1912, the total quantity of grain inspected before loading into vessels was 2,187,148 bushels, as compared with 5,033,573 bushels during the same period in 1911.

Flaxseed receipts at lake ports during April, 1912, amounted to 3,720 bushels, all of which was received at Ludington. There were shipped during April, 1912, 3,720 bushels, all of which was shipped from Manitowoc.

During the season ending April 30, 1912, there were 65,139 bushels received. Frankfort received 10,500 bushels, Grand Haven 21,699 bushels, and Ludington 32,940 bushels. Shipments amounted to 65,139 bushels. Manistique shipped 10,500 bushels, Manitowoc 32,940 bushels, and Milwaukee 21,699 bushels.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during April and four months ending April, 1910, 1911, and 1912. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section includes receipts and shipments of merchandise between New York and New England ports, giving the bulk of the water-borne trade of nine of these ports with New York; coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News, to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from source of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by float to railroad terminals.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio Rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac Rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are compiled are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Black Warrior River for April, 1912, was at Lock No. 4, where 4,257 short tons of freight passed, of which 1,315 short tons were coal and 2,942 short tons were miscellaneous merchandise.

The maximum tonnage on the Cumberland River for April, 1912, was at Lock No. 4, where 26,905 short tons of freight passed.

Upstream tonnage on the Kentucky River for April, 1912, was largest at Lock No. 1, where 8,255 short tons of freight passed, of which 7,203 short tons were coal and 1,052 short tons were miscellaneous merchandise. Downstream tonnage at Lock No. 8 aggregated 11,039 short tons of miscellaneous merchandise. The grand total of freight passing in both directions during the month, at locks of maximum tonnage, was 19,294 short tons.

Upstream tonnage on the Muskingum River for April, 1912, was largest at Lock No. 10, where 1,865 short tons of freight passed, of which 139 short tons were coal and 1,726 short tons were miscellaneous freight. Downstream tonnage at Lock No. 10 aggregated 1,411 short tons, 23 short tons of which were coal and 1,388 short tons were miscellaneous freight. The grand total of freight passing in both directions, for April, at locks of maximum tonnage was 3,276 short tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 20,413 short tons mined in the first and second pools, makes a total traffic of 370,653 short tons. This total, plus 21,849 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic for April, 1912—392,502 short tons.

The total freight moved in both directions, on this basis of calculation, was 522,074 short tons in April, 1912, as against 947,892 short tons in April, 1911, and 372,564 short tons in April, 1912.

For four months ending with April the total movement in both directions was 2,800,972 short tons in 1912, 4,174,208 short tons in 1911, and 3,393,546 short tons in 1910.

The upstream freight passing this point during the four months ending with April, 1912, aggregated 255,395 short tons, in comparison with 301,642 short tons and 316,163 short tons, respectively, for the same period in 1911 and 1910.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For four months ending with April, 1912, of the vessels and barges reported, 469 were loaded with coal; 69 with lumber, logs, and piling; 14 with railroad ties; 83 with merchandise; 7 with rock; 26 with corn; 10 with brick; 7 with wire and nails; and 2 with oil.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, and petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continental fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

PRODUCTION AND SHIPMENT OF CONNELLSVILLE (PA.) COKE.

The following table presents figures of production and shipments of Connellsville coke from Connellsville proper and the so-called Lower District, as reported in the weekly issues of the Connellsville Courier. These figures represent estimates of the Courier verified by and combined with the actual tonnage figures of the local railways.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude

oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois; and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

¹¹Gold and silver can not be stated separately prior to 1876. From 1812 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about \$25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

¹²As the result of a special investigation by the Director of the Mint, a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of \$9,700,000 was made in the estimate of subsidiary silver.

¹³Includes notes of Bank of United States; State-bank notes; demand notes of 1832 and 1833; fractional currency, 1863 to 1878; Treasury notes of 1890, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1900.

¹⁴Individual and other.

DEPARTMENT OF COMMERCE AND LABOR

BUREAU OF STATISTICS

O. P. AUSTIN, CHIEF OF BUREAU

No. 11. SERIES 1911-1912

MONTHLY SUMMARY

OF

COMMERCE AND FINANCE

OF THE

UNITED STATES

MAY, 1912

WASHINGTON
GOVERNMENT PRINTING OFFICE
1912

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained. The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheds, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of Aug. 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel: Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

G. A. WEBER, Chief, Division of Internal Commerce.

MAY SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for May, 1912, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for May and the five months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-one different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for May and five months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

These movements include receipts and shipments for May and five months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities; thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain.) In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during May and five months ending May. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During May transactions at 147 ports of receipt and 172 ports of shipment were reported. The number of vessels arriving in May was 8,766, and the departures, numbered 8,994. The net registered tonnage for the month was as follows: Arrivals, 13,244,940 net tons; departures, 13,840,825 net tons. These totals do not include the tonnage of vessels engaged in the trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, MAY AND FIVE MONTHS ENDING MAY, 1910-1912.

A summary of the Lake traffic for May, and season ending May 31, 1912, compared with the corresponding periods in 1910 and 1911, is given in the following table, which groups the 16 items for which figures are presented in the subsequent tables under 6 more general heads, reduced to their equivalents in short tons. The item "grain and flaxseed" is exclusive of bran and mill stuff, which is comprised under unclassified freight. The item "coal" is composed of anthracite and bituminous coal. The class "ore and minerals" includes pig iron and iron manufactures. The item "lumber" is exclusive of logs, which are reported separately to this office and are included under "unclassified." In addition to logs, the latter class includes a large number of items such as firewood, pulp wood, ties, cement, sand, oil, stone, etc. It also includes the item "package freight," which is commercially the most important item.

¹ Includes flaxseed.² Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 1815.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in May, 1912, consisted of the following: Receipts at Chicago, 6,477 short tons unclassified freight; Conneaut, 110 short tons unclassified freight; and Milwaukee, 2,738 short tons unclassified freight. Shipments from Ashtabula, 43 short tons unclassified freight; Chicago, 217 short tons flour, 427,428 bushels corn, 465 short tons bran and mill stuff, and 64 short tons unclassified freight; Conneaut, 4 short tons iron manufactures, 23 short tons soft coal, and 32 short tons unclassified freight.

The total "in-transit" movement for May was 4 short tons iron manufactures, 23 short tons soft coal, 427,428 bushels corn, 465 short tons bran and mill stuff, 217 short tons flour, and 9,464 short tons unclassified freight.

During the season ending May 31, 1912, the total quantity of grain inspected before loading into vessels was 6,354,280 bushels, as compared with 13,167,743 bushels during the same period in 1911.

Flaxseed receipts at lake ports during May, 1912, amounted to 524,771 bushels. Buffalo received 451,771 bushels; Ludington, 1,000 bushels; and Toledo, 72,000 bushels. GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during May and five months ending May, 1910, 1911, and 1912. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section includes coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News, to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from source of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile. Coastwise coal shipments from New York, Philadelphia, Baltimore, Newport News, and Norfolk are also presented.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk, the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by boat to railroad terminals.

V.—COMMERCIAL MOVEMENTS IN SOUTHERN TERRITORY.

The territory covered in this section includes that lying south of the Potomac and Ohio rivers and east of the Mississippi River and that portion west of the Mississippi included in the States of Louisiana, Oklahoma, and Texas. The characteristic traffic movements are those of cotton, lumber, naval stores, and general commodities.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VI.—COMMERCIAL MOVEMENTS ON THE PACIFIC COAST.

Traffic operations reported in this territory consist mainly of receipts from productive areas on the Pacific slope at seaboard ports of outlet, of coastwise movements between the upper and the lower Pacific coasts, and of overland shipments to the East. The operations usually reported include receipts and shipments of merchandise at San Francisco; lumber shipments from the Pacific Northwest States and from principal northern Pacific ports; commerce at the ports of Portland, Seattle, and Tacoma; and the shipments of citrus fruit from southern California.

SHIPMENTS OF LUMBER FROM PACIFIC NORTHWEST.

The number of mills reported should be taken account of in connection with the figures in the above table. During the five months ending with May the average number was 56 in 1910, 45 in 1911, and 37 in 1912, or 8 more in 1911 than in 1912.

Shipments of pine from the Pacific Northwest during the five months ending May, 1912, amounted to 13,774 cars and were distributed as follows: Local, 4,482; North Dakota, 778; South Dakota, 843; Minnesota, 858; Wisconsin, 614; Iowa, 779; Illinois, 590; Kansas, 33; Nebraska, 759; Missouri, 31; Colorado, 498; Wyoming, 115; Utah, 500; Michigan, 115; Ohio, 126; Indiana, 29; Atlantic Coast States, 486; other Eastern States, 242; Canada, 1,468; Nevada, 1; Oklahoma, 2; and unclassified, 427.

During the corresponding period in 1911 the shipments amounted to 12,073 cars and were distributed as follows: Local, 4,605; North Dakota, 710; South Dakota, 1,357; Minnesota, 562; Wisconsin, 616; Iowa, 886; Illinois, 545; Kansas, 71; Nebraska, 830; Missouri, 33; Colorado, 433; Wyoming, 150; Utah, 288; Michigan, 104; Ohio, 40; Indiana, 26; Atlantic Coast States, 154; other Eastern States, 129; Canada, 533; Nevada, 1.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware Bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are compiled are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Black Warrior River for May, 1912, was at Lock No. 5, where 5,561 short tons of freight passed, of which 269 short tons were coal, and 5,292 short tons were miscellaneous freight.

The maximum tonnage on the Cumberland River for May, 1912, was at Lock No. 3, where 19,950 short tons of freight passed.

Upstream tonnage on the Kentucky River for May, 1912, was largest at Lock No. 1, where 3,457 short tons of freight passed, of which 2,563 short tons were coal, and 894 short tons were miscellaneous merchandise.

Downstream tonnage at Lock No. 11 aggregated 140 short tons of miscellaneous merchandise. The grand total of freight passing in both directions during the month at locks of maximum tonnage was 3,597 short tons.

Upstream tonnage on the Muskingum River for May, 1912, was largest at Lock No. 8, where 1,361 short tons of freight passed. Downstream tonnage was largest at Lock No. 10, where 2,491 short tons of freight passed, of which 182 short tons were coal, and 2,309 short tons were miscellaneous freight. The grand total of freight passing in both directions at locks of maximum tonnage was 3,852 for the month of May.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 49,011 short tons mined in the first and second pools, makes a total traffic of 1,011,531 short tons. This total, plus 30,121 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic for May, 1912—1,041,652 short tons.

The total freight moved in both directions, on this basis of calculation, was 1,162,981 short tons in May, 1912, as against 991,978 short tons in May, 1911, and 1,035,938 short tons in May, 1910.

For the five months ending with May the total movement in both directions was 3,963,953 short tons in 1912, 5,166,186 short tons in 1911, and 4,479,481 short tons in 1910.

The upstream freight passing this point during the five months ending with May, 1912, aggregated 376,724 short tons, in comparison with 457,943 short tons and 455,047 short tons, respectively, for the same period in 1911 and 1910.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For five months ending with May, 1912, of the vessels and barges reported, 766 were loaded with coal; 92 with lumber, logs, and piling; 22 with railroad ties; 124 with merchandise; 8 with rock; 26 with corn; 10 with brick; 7 with wire and nails; and 8 with oil.

MOVEMENT OF VESSELS VIA CAIRO, ILL., AT OHIO AND MISSISSIPPI RIVER PORTS, MAY AND FIVE MONTHS ENDING MAY, 1910, 1911, AND 1912.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima, Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois; and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

¹¹ Gold and silver can not be stated separately prior to 1876. From 1832 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about \$25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

¹² As the result of a special investigation by the Director of the Mint, a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of \$9,703,000 was made in the estimate of subsidiary silver.

¹³ Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1863 to 1878; Treasury notes of 1893, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1903.

¹⁴ Individual and other.

¹⁵ Gold values, being 80 per cent of currency values reported.

¹⁶ Includes value of buildings, \$3,559,639,496. The Twelfth Census was the first to collect statistics of buildings on farms.

¹⁷ Includes value of buildings, \$3,325,451,528.

¹⁸ Data of the Department of Agriculture, representing wealth production on farms. Figures for 1910 include products fed to live stock.

EXPLANATIONS OF REGULAR STATISTICAL TABLES.

General imports.—The regular statement of imports of merchandise, by articles and countries, in this publication is what is termed the statement of *general imports*, embracing imported articles entered for immediate consumption on arrival and articles entered for warehouse, as distinguished from special imports, which embrace imports entered for immediate consumption and withdrawals from warehouse for consumption.

The statement of *general imports* and the statement of *imports entered for consumption* for any period will differ to the extent that the value of *entries for warehouse* for the period differs from the value of *withdrawals from warehouse for consumption*. The term "*entry for consumption*" is the technical name of the import entry made at the customhouse, and does not imply that the goods have been actually consumed, but simply that they have been delivered into the custody of the importer and that the duties have been paid on the dutiable portion.

Kinds, quantities, and values, how ascertained.—The kinds and quantities of all imported merchandise, free from duty, are ascertained by entry, made upon oath or affirmation by the owner, or by the consignee or agent of the importer, or by actual examination where the collector shall think such examination necessary; and the values of all such merchandise are ascertained in the same manner in which the values of imports subject to duties ad valorem are ascertained.

The values of all imported articles subject to specific duties shall be ascertained in the manner in which the values of imports subject to duties ad valorem are ascertained.

The value of merchandise imported since August 5, 1909, subject to ad valorem rates of duty and duty imposed upon and regulated in any manner by the value thereof shall be "the actual market value or wholesale price thereof, at the time of exportation to the United States, in the principal markets of the country from whence exported; that such actual market value shall be held to be the price at which such merchandise is freely offered for sale to all purchasers in said markets, in the usual wholesale quantities, and the price which the manufacturer or owner would have received, and was willing to receive, for such merchandise when sold in the ordinary course of trade in the usual wholesale quantities, including the value of all cartons, cases, crates, boxes, sacks, casks, barrels, hogsheds, bottles, jars, demijohns, carboys, and other containers or coverings, whether holding liquids or solids, and all other costs, charges, and expenses incident to placing the merchandise in condition, packed ready for shipment to the United States." (Rev. Stats. 336, secs. 18 and 11 of the act of June 10, 1890, as amended by act of Aug. 5, 1909, sec. 28, and Customs Regs., 1908, art. 1604.)

Domestic exports.—The regular statement of domestic exports, by articles and countries, in this publication exhibits the exports of domestic products of manufactures, also exports of commodities of foreign origin which have been changed from the form in which they were imported or enhanced in value by further manufacture in the United States, such as sugar refined in this country from imported raw sugar, flour ground from imported wheat, and articles, utensils, etc., made from imported materials. The value of exports of domestic merchandise is their value at the time of exportation in the ports of the United States whence they are exported.

Foreign exports.—The regular statement of foreign exports, by articles, in this publication, sometimes called "reexports," exhibits exports of foreign merchandise which had been imported. The value of such commodities exported "from warehouse" is their import value; the value of such commodities exported "not from warehouse," comprising free goods mainly, is the value at the ports of the United States whence they are exported.

Warehoused merchandise.—The regular statement of articles remaining in warehouse in this publication exhibits imported merchandise in bonded warehouses. This merchandise has already appeared in the statement of *general imports*. The official values of the articles therein represented are the same as the *import values*.

Tonnage tables.—In the tables of tonnage movement in American foreign trade the tonnage is stated in net tons of 100 cubic feet carrying space after the prescribed allowances are made for crew space, engine space, etc.

Weights.—In all tables published by the bureau the measures of quantity are as follows, unless indicated otherwise: Ton, 2,240 pounds; hundredweight, 112 pounds. Number of pounds to the barrel: Wheat flour, rye flour, and corn meal, 196 pounds net weight; rosin, tar, and turpentine, 280 pounds net; fish, pickled, 200 pounds net; cement, 380 pounds net (counting 4 bags to the barrel). Number of pounds to the bushel is as follows: Wheat, beans, and potatoes, 60 pounds; barley and buckwheat, 48 pounds; corn, rye, and flaxseed, 56 pounds; onions, 57 pounds; oats, 32 pounds; malt, 34 pounds.

Customs districts.—Statements of imports, exports, and tonnage movement are shown by customs districts, which have a certain prescribed limit of territory with a port of entry. The customs districts having the port of entry with name different from that of the customs district are the following:

COMMERCE BETWEEN THE UNITED STATES AND ITS NONCONTIGUOUS TERRITORIES AND BETWEEN SAID TERRITORIES AND FOREIGN COUNTRIES.

The following tables show the commerce of the noncontiguous territories of the United States with the United States and with foreign countries for comparative periods of time. Customs collectors were not required prior to the act of April 29, 1902, to furnish statements of shipments of merchandise between the United States and its noncontiguous possessions.

Hawaii was annexed to the United States by act of Congress of July 7, 1898, and was made a Territory and customs district by act of April 30, 1900, which took effect June 14, 1900.

Porto Rico was taken possession of by the United States October 18, 1898, and was given a civil government and made a customs district by act of April 12, 1900, to take effect May 1, 1900.

The figures of the commerce between the Philippine Islands and the United States, while at present included in the general tables of foreign commerce of the United States, are also presented herewith in conjunction with the other tables of this group.

INTERNAL COMMERCE OF THE UNITED STATES.

G. A. WEBER, Chief, Division of Internal Commerce.

JUNE SUMMARY OF INTERNAL TRADE MOVEMENTS.

The Summary of Internal Commerce for June, 1912, includes tables exhibiting the comparative progress of trade movements in different parts of the United States for June and the six months of the current and two or more preceding years. These statistics are gathered partly through the cooperation of commercial organizations and transportation companies, partly by compilation from authoritative trade publications, and to an increasing extent from official reports made by this and other departments of the public service. Statistics of domestic commerce on the Great Lakes, unless otherwise credited, are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

The tables which appear in this issue represent six different geographical sections, as follows: I. Commercial movements at interior centers; II. Coastwise commerce on the Great Lakes; III. Commercial movements at the North Atlantic seaboard; IV. Coastwise commerce at Atlantic and Gulf ports; V. Commercial movements in southern territory; and VI. Commercial movements on the Pacific coast. Other tables representing no particular geographical sections are: VII. Commercial movements on rivers and canals; VIII. Commercial movements of coal, coke, and petroleum, and pig-iron production; and IX. Ocean freight rates.

The unit of weight used in the Summary of Internal Commerce is either the "long" ton of 2,240 pounds or the "short" ton of 2,000 pounds. The term "net ton" is used exclusively to denote the unit of vessel measurement (100 cubic feet of carrying capacity, exclusive of space occupied by cabins, machinery, etc.).

COMPARISON OF CAR-SERVICE OPERATIONS.

A convenient index to the traffic activities of the country is found in the comparative figures of cars handled by the various car-service associations and demurrage bureaus. Twenty-one different associations and demurrage bureaus report monthly the number of cars handled in their respective territories. Only in a very rough way, however, do these figures indicate the changes in volume of traffic, inasmuch as they do not, in some cases, include more than one-third of the cars actually handled at a given traffic center, and the territory under control of an association may be extended or contracted from time to time. The figures are given, nevertheless, as a convenient general gauge of increase or decrease of traffic by rail, assuming that they are made up on substantially the same basis from year to year.

I.—COMMERCIAL MOVEMENTS AT INTERIOR CENTERS.

The territory embraced in this section extends from Minneapolis, in the Northwest, to Little Rock, in the Southwest, east as far as Buffalo, and south as far as the Ohio River. Interior traffic movements for June and six months of succeeding years are shown by tables of live-stock receipts and shipments and comparative stocks of provisions at the most important packing-house centers; by tables of receipts and shipments of flour, grain, produce, and merchandise; and by trunk-line shipments of flour, grain, and provisions from Chicago. Ohio River traffic is reported under Section VII—Commercial movements on rivers and canals.

WESTERN LIVE-STOCK MOVEMENTS.

These movements include receipts and shipments for June and six months at important interior markets for three successive years. For receipts of live stock at other markets whose operations are reported in this issue reference should be made to the general trade movement of these sections.

GRAIN MOVEMENTS AT INTERIOR MARKETS.

This movement includes receipts and shipments of grain, flaxseed, and flour as reported to the bureau by the commercial organizations of the respective cities. It should be noted that the methods used in recording the movement vary in the different cities; thus, receipts at Chicago and St. Louis include through business. Part of the through business may be actually handled at these points. (In such cases the proportion of the through rate is paid and the balance used on what is known as "tonnage for shipments" on other cars of grain. In some markets receipts include all grain billed direct to the respective market, whether reconsigned after receipt or not. This is true of receipts at Milwaukee, Cleveland, Cincinnati, and Omaha. In other markets the local produce or grain exchanges report as receipts all grain inspected inward by their inspectors, including small quantities not unloaded and forwarded. This is the case in Detroit, Toledo, and Kansas City. Other markets, such as Duluth, Minneapolis, Little Rock, and Louisville, make a strict distinction between purely

local business—i. e., quantities actually unloaded at local elevators or warehouses—and mere car arrivals or quantities billed to local consignees. Equally varying are the practices of the different organizations in classing and reporting shipments, which in the case of Chicago and St. Louis include through shipments; in some cities all quantities forwarded or rebilled, even if not unloaded; and in other cities shipments out of local elevators and warehouses or from local wharves or piers. This lack of uniformity naturally results in a considerable degree of duplication and even reduplication, and this fact is to be borne in mind when comparisons between various markets are made.

II.—DOMESTIC COMMERCE ON THE GREAT LAKES.

The traffic taken account of in the following tables, except where otherwise specified, is coastwise traffic only, and is confined strictly to commerce between domestic ports during June and six months ending June. Unless otherwise credited, the statistics of domestic commerce reported herewith are compiled from supplementary manifests prepared by masters of vessels reporting through the collectors of customs.

During June transactions at 154 ports of receipt and 205 ports of shipment were reported. The number of vessels arriving in June was 10,638, and the departures numbered 10,633. The net registered tonnage for the month was as follows: Arrivals, 16,474,309 net tons; departures, 16,452,270 net tons. These totals do not include the tonnage of vessels engaged in the trade between the United States and Canada.

SUMMARY OF DOMESTIC LAKE TRAFFIC, JUNE AND SIX MONTHS ENDING JUNE, 1910-1912.

A summary of the Lake traffic for June, and season ending June 30, 1912, compared with the corresponding periods in 1910 and 1911, is given in the following table, which groups the 16 items for which figures are presented in the subsequent tables under 6 more general heads, reduced to their equivalents in short tons. The item "grain and flaxseed" is exclusive of bran and mill stuff, which is comprised under unclassified freight. The item "coal" is composed of anthracite and bituminous coal. The class "ore and minerals" includes pig iron and iron manufactures. The item "lumber" is exclusive of logs, which are reported separately to this office and are included under "unclassified." In addition to logs, the latter class includes a large number of items, such as firewood, pulp wood, ties, cement, sand, oil, stone, etc. It also includes the item "package freight," which is commercially the most important item.

¹ Includes flaxseed.² Does not include coal supplied to vessels for their own fueling purposes. For particulars regarding quantities of bunker coal supplied to vessels in the domestic trade at lake ports, see page 192.

In the above table Detroit commerce was treated as part of Lake Erie commerce; the Lake Huron figures include all the commerce north of Detroit and south of Sault Ste. Marie.

Merchandise transported between United States points, but passing, under bond, through Canadian territory, is known as "in-transit" movement. That class of tonnage which required the use of the Great Lakes as a link in its journey in June, 1912, consisted of the following: Receipts at Chicago, 5,742 short tons unclassified freight; Conneaut, 1,336 short tons unclassified freight; and Milwaukee, 2,595 short tons unclassified freight. Shipments from Ashtabula, 22 short tons unclassified freight; Chicago, 27 short tons iron manufactures, 118 short tons flour, 1,561,493 bushels corn, 1,317 short tons bran, and 123 short tons unclassified freight; Conneaut, 135 short tons iron manufactures, and 64 short tons unclassified freight.

GRAIN RECEIPTS AT SIX DOMESTIC SEAPORTS.

Below is given a comparative table of receipts of grain, including flour reduced to bushels, at six seaboard markets during June and six months ending June, 1910, 1911, and 1912. The figures are derived in every case from the reports of the commercial organizations closely identified with the grain trade at the respective localities. These totals serve to show the relative share of each port in this branch of domestic commerce.

IV.—COASTWISE COMMERCE AT ATLANTIC AND GULF PORTS.

The scope of commercial movements represented in this section includes coal shipments by water from New York, Philadelphia, Baltimore, Norfolk, and Newport News to seaboard points north and south; coastwise receipts of southern pine and eastern spruce, by cargoes, at New York from source of origin; and coastwise and foreign shipping movements at Boston, New York, Philadelphia, and Mobile.

COAL SHIPMENTS BY WATER FROM NEW YORK, PHILADELPHIA, BALTIMORE, NEWPORT NEWS, AND NORFOLK.

Through the courtesy and cooperation of nearly all of the more prominent shippers of coal by water from the Middle Atlantic ports of New York, Philadelphia, Baltimore, Newport News, and Norfolk the following figures of the coastwise coal movements have been obtained. These statistics cover probably more than 90 per cent of the shipments at the places and for the periods mentioned and include both anthracite and bituminous coal. Anthracite coal is shipped principally from New York Harbor wharves. From Philadelphia shipments are primarily bituminous and, to a small extent only, anthracite. From Baltimore, Newport News, and Norfolk shipments are almost wholly bituminous. The figures given include domestic shipments by water proper, as well as amounts of bunker coal supplied to vessels in the domestic and foreign trades. In the case of New York the figures include also the quantities of anthracite and bituminous coal shipped across the river for local consumption in Greater New York and vicinity. No account is taken of the quantities of coal transported by boat to railroad terminals.

Receipts of live stock at New Orleans for four weeks ending with June 26, 1912, amounted to 12,340 head, of which 9,584 were cattle, 2,301 hogs, 183 sheep, and 272 milch cows. Arrivals for a similar period in 1911 amounted to 12,614 head, of which cattle constituted 9,997, hogs 2,031, sheep 342, and milch cows 244; and for 1910 the arrivals for a similar period aggregated 15,803 head, of which 13,251 were cattle, 1,651 hogs, 665 sheep, and 236 milch cows.

During 26 weeks ending June 26, 1912, arrivals of live stock reached a total of 101,094 head, in comparison with 90,251 head in 1911 and 98,220 head in 1910. Of the totals for the half year cattle constituted 68,804, hogs 29,807, sheep 927, and milch cows 1,556, in comparison with 68,963 cattle, 18,297 hogs, 1,568 sheep, and 1,423 milch cows during the first six months of 1911, and 78,160 cattle, 16,853 hogs, 1,646 sheep, and 1,561 milch cows during the same period in 1910.

SOUTHERN COTTON MOVEMENT.

According to the practice of the New Orleans Cotton Exchange, whose official figures are used except when otherwise specified, the amount of cotton brought into sight from month to month during the season includes (1) receipts from plantations at ports; (2) receipts at the overland points of crossing on the Mississippi, Ohio, and Potomac rivers for shipment direct to northern and eastern mills; and (3) takings by southern mills. To this must be added (4) stocks left over at the end of the year at ports and interior towns. These four items together give the total commercial supply available for distribution.

VII.—COMMERCIAL MOVEMENTS ON RIVERS AND CANALS.

The movements of domestic trade represented under this heading are not confined to any particular geographical division of the country. Operations on some of the leading waterways include those on the Monongahela River between Pittsburgh, Pa., and Fairmont, W. Va.; the Ohio River at Davis Island Dam, Bellevue, Pa., and at Louisville, Ky.; the vessel movement at Cairo, Ill., on the Ohio and the Mississippi Rivers; the traffic movements on New York State canals; and the Delaware & Chesapeake Canal, connecting the Chesapeake and Delaware Bays; and similar movements on various navigable streams about whose navigation acceptable information is periodically available.

Unless otherwise specified, the data out of which the following tables are compiled are derived from monthly reports received from the engineers in charge of river and harbor improvements under the auspices of the War Department.

The maximum tonnage on the Big Sandy River for June, 1912, was at Lock No. 2, where 4,329 short tons of freight passed.

The maximum tonnage on the Black Warrior River for June, 1912, was at Lock No. 5, where 4,648 short tons of freight passed, of which 167 short tons were coal, and 4,481 short tons were miscellaneous freight.

The maximum tonnage on the Cumberland River, for June, 1912, was at Lock No. 1, where 10,445 short tons of freight passed.

Upstream tonnage on the Kentucky River for June, 1912, was largest at Lock No. 3, where 6,337 short tons of freight passed, of which 6,300 short tons were coal and 37 short tons were miscellaneous merchandise.

Downstream tonnage at Lock No. 8 aggregated 13,764 short tons. The grand total of freight passing in both directions during the month at locks of maximum tonnage was 20,101 short tons.

Upstream tonnage on the Muskingum River for June, 1912, was largest at Lock No. 10, where 1,450 short tons of freight passed. Downstream tonnage was largest at Lock No. 10, where 1,620 short tons of freight passed, of which 111 short tons were coal and 1,509 short tons were miscellaneous freight. The grand total of freight passing in both directions at locks of maximum tonnage during the month was 3,070 short tons.

TRAFFIC ON THE MONONGAHELA RIVER.

The iron and steel products passing Lock No. 1 represent practically the entire river traffic of these products. The coal passing downstream through Lock No. 3, plus 40,975 short tons mined in the first and second pools, makes a total traffic of 1,034,655 short tons. This total, plus 1,598 short tons of miscellaneous merchandise which passed through Lock No. 3 during the month, represents approximately the general aggregate of downstream traffic for June, 1912—1,036,253 short tons.

The total freight moved in both directions, on this basis of calculation, was 1,156,056 short tons in June, 1912, as against 637,740 short tons in June, 1911, and 1,090,057 short tons in June, 1910.

For the six months ending with June the total movement in both directions was 5,120,009 short tons in 1912, 5,803,926 short tons in 1911, and 5,569,541 short tons in 1910.

The upstream freight passing this point during the six months ending with June, 1912, aggregated 496,527 short tons, in comparison with 606,113 short tons and 553,658 short tons, respectively, for the same period in 1911 and 1910.

VESSEL MOVEMENT ON THE MISSISSIPPI AND OHIO RIVERS VIA CAIRO, ILL.

The following table is compiled from monthly reports received from Cairo, Ill., giving the number and tonnage of vessels passing or having their termini there. The tonnage of boats and barges is estimated tonnage. The tonnage of steamboats is actual.

The total through movement represents vessels passing Cairo to or from points on the Ohio, Mississippi, and other rivers. The local movement at Cairo represents vessels having Cairo as one of their termini. (The monthly reports of arrivals and departures are made by Mr. George Parsons, trustee of Cairo trust property, who is intimately acquainted with river operations at this point.)

For six months ending with June, 1912, of the vessels and barges reported 10 were loaded with brick; 5 with cement; 994 with coal; 26 with corn; 113 with lumber, logs, and piling; 202 with merchandise; 10 with oil; 28 with railroad ties; 8 with rock; and 7 with wire and nails.

VIII.—COMMERCIAL MOVEMENTS OF COAL, COKE, AND PETROLEUM—PRODUCTION OF PIG IRON.

The series of tables following present some of the leading traffic operations in domestic coal, coke, petroleum; also figures of pig-iron production by principal districts. They include shipments of anthracite coal from the anthracite regions, anthracite and bituminous coal and coke shipments east of Pittsburgh and Erie on the Pennsylvania Railroad system, coal and coke shipments over the Baltimore & Ohio Railroad, the Chesapeake & Ohio Railway, the Norfolk & Western Railroad, and other eastern roads; weekly Connellsville coke output and shipments; St. Louis receipts of coal. Petroleum statistics are included for the pipe-line territory in the Appalachian, Lima-Indiana, and Mid-Continent fields. Statistics of pig-iron production cover the principal producing districts, and are exclusive of small quantities of charcoal iron. For coastwise coal trade generally, see Section IV; for Lake trade, Section II.

STATEMENT OF PIPE LINES IN APPALACHIAN, LIMA-INDIANA, AND MID-CONTINENT FIELDS.

The following table shows the business of the principal petroleum pipe lines in the Appalachian, Lima-Indiana, and Mid-Continent fields. The Appalachian field includes Pennsylvania, New York, West Virginia, southeastern Ohio, Kentucky, and Tennessee. The Lima-Indiana field includes northwestern Ohio, Indiana, and the productions in Illinois. The Mid-Continent field includes Kansas and Oklahoma.

The pipe lines which report no runs from wells receive their oil through other pipe lines. The regular deliveries represent deliveries to refineries and for export and do not include deliveries to other pipe lines. The runs from wells represent Appalachian oil exclusively in all cases except three, namely: The Buckeye, which receives Appalachian crude oil from southeastern Ohio and Lima-Indiana crude oil from northwestern Ohio; the Indiana Pipe Line Co., which receives crude oil from Indiana and Illinois; and the Prairie Oil & Gas Co., which operates in the Mid-Continent field.

Prior to August, 1906, the Buckeye pipe line reported separately its Appalachian crude oil, and its Lima-Indiana crude oil was reported jointly with that of the Indiana pipe line. Also, prior to this date, the pipe line distinguished deliveries and net stocks of Appalachian oil from those of Lima-Indiana oil, but at present the deliveries and stocks of several of the companies reported in the following table include both kinds of crude oil.

Net stocks, often called liabilities, represent the amount of oil for which the pipe lines have receipted to producers and for which they are liable. In addition, the pipe lines hold a certain amount of sediment and surplus oil, which, combined with net stocks, constitute gross stocks.

¹³ Gold and silver can not be stated separately prior to 1876. From 1862 to 1875, inclusive, gold and silver were not in circulation except on the Pacific coast, where it is estimated that the average specie circulation was about \$25,000,000, and this estimate is continued for the three following years under the head of gold. After that period gold was available for circulation.

¹⁴ As the result of a special investigation by the Director of the Mint, a reduction of \$135,000,000 was made in the estimate of gold coin in circulation on July 1, 1907, as compared with the basis of previous years, and on Sept. 1, 1910, a reduction of \$9,700,000 was made in the estimate of subsidiary silver.

¹⁵ Includes notes of Bank of United States; State-bank notes; demand notes of 1862 and 1863; fractional currency, 1863 to 1875; Treasury notes of 1890, 1891 to date; and currency certificates, act of June 8, 1872, 1892 to 1900.

¹⁶ Individual and other.

¹⁷ Gold values, being 80 per cent of currency values reported; figures of products include betterments and additions to live stock.

¹⁸ Includes value of buildings, \$3,556,639,496. The Twelfth Census was the first to collect statistics of buildings on farms.

¹⁹ Includes value of buildings, \$6,325,451,528.

²⁰ Data of the Department of Agriculture, representing wealth production on farms.

²¹ Exclusive of neighborhood industries and hand trades, included in years previous to 1905.
